

Introduction

AFRICAN IMMUNOLOGY OF PARASITES, PATHOGENS, AND PATHOGENESIS (AFriBOP)

AfriBOP is a week-long course that targets PhD students and early postdocs interested in the interaction between the immune system and pathogens – including how this underlies the pathogenesis of a wide range of infectious and non-communicable diseases.

The course constitutes intensive, interactive learning sessions and simulations on the most recent advances in immunology and the consequences of chronic immune activity on human health.
